

18kW Distribution Box Specifications

Overview

18 module Insulated Distribution Enclosure made from an IP65 ABS enclosure with polycarbonate lid with H:230 x W:380 x D:100mm dimensions. Complete with din rail, earth and neutral terminals. With its durable construction, flexible compatibility, and outstanding safety features, this panel box ensures effective power distribution and protection. With its. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Actual units use PNP status indicator, NPN status indicator, or neither. Dimensions are shown in mm (in. 81 ft)]. the DC Input Voltage Range. Any damage caused by reaching >600VDC will no be covered under warranty. **When sizing the system, it is best practice to follow the nominal MPPT voltage specifications and not the minimum/maximum voltage of the M PT operating voltage range. Only qualified personnel. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required.
