

192-core optical distribution box

AI Overview

A 192-core optical distribution box is a high-capacity enclosure designed for fiber splicing, distribution, and protection in FTTH, FTTB, and backbone networks.

Key Features

- **Capacity and Configuration:** Supports up to 192 fiber cores, typically organized with 8 splice trays of 24 cores each or similar modular arrangements for efficient fiber management .
- **Material and Durability:** Constructed from high-strength engineering plastics or PP material, offering excellent impact resistance, UV protection, anti-aging, and corrosion resistance for long-term outdoor or indoor use .
- **Environmental Protection:** IP55 to IP68 rated, providing dustproof, waterproof, and weather-resistant performance suitable for harsh outdoor conditions, including extreme temperatures from -40°C to 85°C .
- **Internal Layout:** Designed to accommodate splice trays, adapter panels, and cable routing, ensuring organized fiber splicing, branching, and termination. Excess fiber cords and pigtails are managed efficiently to prevent tangling and facilitate maintenance .
- **Installation Flexibility:** Can be mounted on walls, poles, or aerial setups, making it suitable for diverse deployment scenarios such as telecom towers, building walls, corridors, and outdoor cabinets .

Applications

- **FTTH, FTTB, and FTTC Networks:** Converts distribution cables into individual fibers...
