

24-port access switch quota application

Overview

Click any of the links below to view the document for the selected software version. The Cisco Catalyst 1000 Series switches are fixed-configuration, Gigabit Ethernet switches that provide entry-level enterprise-class Layer 2 access for branch offices, conventional workspace, and out-of-wiring closet applications. PoE Wattage per Port by PSE Max. Power Consumption Enterprise-grade 24-port, Layer 3 Etherlighting™ PoE+++ switch with Stacking support and high-capacity 10 GbE RJ45 and 25G SFP28 connections for high availability system design. Redundant power supply ensures uninterrupted operation while boosting PoE output for high-demand devices The SIM feature lets you manage multiple switches as a virtual stack under one IP, streamlining operations and integration Features includes VLANs, ACLs, Port Security, 802. 1X, and RADIUS to. The D-Link DGS-F1500-28MP 24 Port Gigabit PoE Managed Switch is the latest generation of switch to provide increased Power over Ethernet (PoE) output, a range of physical interface types, multiple management interfaces, and advanced Layer 2 features. Featuring 24 Gigabit Ethernet access ports and 4x1/10G SFP uplinks, this managed switch centralizes data and power delivery for multiple devices, reducing cabling complexity. In addition, it also supports other functions for L2.
