

48-core optical fiber cable bundle tube color

AI Overview

A 48-core optical fiber cable typically uses four buffer tubes, each containing 12 fibers, with the standard 12-color sequence applied to both tubes and fibers.

Buffer Tube Colors

In a 48-fiber cable, the fibers are usually organized into four buffer tubes, each containing 12 fibers. The outer tube colors follow a standard sequence to distinguish each tube, often using the first four colors of the 12-color fiber sequence: Blue, Orange, Green, and Brown .

Individual Fiber Colors

Within each buffer tube, the 12 fibers are color-coded according to the TIA/EIA-598 standard as follows:

- Blue
- Orange
- Green
- Brown
- Gray
- White
- Red
- Black
- Yellow...
