

72-core ODFFFC fiber optic distribution frame

AI Overview

A 72-core ODF (Optical Distribution Frame) is a high-density fiber management solution for terminating, splicing, and distributing up to 72 optical fibers in telecom networks and data centers.

Overview

A 72-core ODF is designed to manage optical fibers efficiently, providing a centralized point for fiber termination, splicing, storage, and distribution. It is widely used in FTTH deployments, central offices, and data centers, enabling reliable and organized fiber connections between incoming and outgoing cables. The frame supports high port density while maintaining low signal loss and mechanical protection for fibers.

Key Features

- **Fiber Capacity:** Supports up to 72 fiber cores, suitable for medium-scale network deployments.
- **Connector Type:** Often uses FC/APC angled physical contact connectors, which reduce back reflection and support low-loss single-mode transmission.
- **Rack Compatibility:** Complies with 19-inch rack standards, allowing integration into telecom cabinets or data center racks.
- **Fiber Management:** Includes sliding trays, splice trays, and cassette-based layouts for organized routing, proper bend radius, and easy maintenance.
- **Durability:** Constructed from cold-rolled steel or high-quality plastic, with powder-...
