

8-core optical fiber cable with armor

AI Overview

Eight-core armored fiber optic cables provide high-speed, durable, and protected data transmission for indoor, outdoor, and industrial applications.

Overview

An 8-core armored fiber optic cable consists of eight individual optical fibers enclosed within a protective armored layer, designed to resist mechanical damage, environmental stress, and rodent attacks. These cables are available in singlemode (OS2, G652D/G657A1) and multimode (OM3, OM4) variants, supporting high-bandwidth data transmission over long distances .

Construction and Features

- **Armoring:** Steel or metal tape armor provides crush resistance, gunshot resistance, and protection against external mechanical forces . Some tactical cables combine stainless steel and aramid yarn for flexibility and tensile strength .
- **Fiber Type:**
 - **Singlemode (OS2):** Ideal for long-distance, high-speed networks (10G/40G/100G) with low attenuation (~ 0.3 dB/km at 1310 nm), .
 - **Multimode (OM3/OM4):** Suitable for high-bandwidth short-to-medium distance applications, such as data centers .
- **Jacket Material:** Options include PE, PVC, LSZH, or TPU, providing UV resistance, flame retardancy, and environmental protection .
- **Strength Members:** Aramid yarns or steel wires enhance tensile strength and prev...
