

A comprehensive price list for high-voltage distribution boxes

AI Overview

High voltage distribution boxes typically range from USD 500 to over USD 5,000 per unit, depending on specifications, type, and customization.

Price Overview

The cost of high voltage distribution boxes varies widely based on voltage rating, AC or DC type, materials, and additional features such as surge protection, insulation, and modular design . Standard AC high voltage boxes for industrial or commercial use generally start around USD 500–1,500 per unit, while more advanced or customized units, including DC boxes for renewable energy integration, can exceed USD 3,000–5,000 per unit . Bulk orders or factory-direct purchases from manufacturers in regions like China may reduce per-unit costs significantly .

Factors Affecting Price

- **Type of Box:** AC distribution boxes are widely used and often less expensive than DC boxes, which are increasingly required for solar, wind, and EV charging infrastructure .
- **Material and Build Quality:** Premium enclosures with corrosion-resistant metals, high-grade insulation, and IP-rated protection increase durability and cost .
- **Customization:** OEM or custom designs, including busbar configurations, cable entry modifications, and branding, can raise the price .
- **Market Region:** Prices vary by region due to labor, shipping, and local regulations....
