

A switch with five optical ports

AI Overview

The LevelOne FEU-0511 and Advantech ADAM-6521-BE are examples of 5-port switches featuring one optical fiber port for flexible copper-to-fiber networking.

LevelOne FEU-0511

The FEU-0511 is a compact 5-port Fast Ethernet switch designed to bridge copper and fiber networks. It includes:

- 4 x 10/100BASE-TX RJ45 ports for standard Ethernet connections
 - 1 x 100BASE-FX SC multi-mode fiber port for optical uplink, supporting distances up to 2 km
 - Auto-negotiation and auto-MDI/MDIX on all copper ports for simplified cabling
 - Store-and-forward switching with IEEE 802.3x Flow Control to reduce frame loss
 - Plug-and-play design with front-panel LEDs for link and activity monitoring
- This switch is ideal for small offices, industrial sites, or remote locations where extending a LAN over fiber is required without complex configuration .

Advantech ADAM-6521-BE

The ADAM-6521-BE is another 5-port switch with one multi-mode fiber-optic port. It is designed for industrial and remote I/O applications, providing reliable Ethernet-to-fiber connectivity. While specific technical details like speed and distance are not fully listed in the source, it is suitable for environments requiring robust, fiber-enabled networking
