

ASEAN Electro-galvanized Cable Tray Specifications

AI Overview

Electro-galvanized cable trays in ASEAN are typically made from high-grade electro-galvanized steel, available in light to super heavy-duty types, with ladder, perforated, or solid-bottom designs, and comply with NEMA VE-1 or equivalent IEC standards.

Material and Coating

Electro-galvanized cable trays are constructed from high-grade electro-galvanized sheet steel, providing corrosion resistance suitable for indoor and mildly corrosive environments. Other available materials include hot-rolled steel with hot-dip galvanization, stainless steel (AISI 304, 316, 316L), aluminum, and ZAM (Zinc-Aluminium-Magnesium) coatings for enhanced durability. Epoxy powder coating can also be applied for additional protection.

Tray Types

Cable trays are generally available in the following constructions :

- Standard Type (Straight Flange)
- Returned Flange - Type A
- Returned Flange - Type B Tray designs include ladder type (with rungs for cable support), perforated trays, and solid-bottom trays. Ladder trays are commonly used for heavy cabling and allow ventilation and heat dissipation....
