

Actual distance of 3km optical module

Overview

3 targets up to 3200m away, with a maximum range exceeding 4600m, meeting laser safety class 1 standard. According to the different transmission distances of optical modules, they can be divided into three types: short-distance optical modules, medium-distance optical modules, and long-distance optical modules. Among them, long-distance optical modules refer to optical modules with a transmission. The Fiber Optic Reel offers a sleek, durable solution for storing and managing optical fibers with ease. Built for reliability, it ensures smooth cable deployment without straining the fiber. Key Features Material: ABS (Black) - Strong and lightweight. 063Gbps and 3km transmission distance with SMF. Light commonly used in optical fiber is 850nm.
