

Aluminum Alloy Cable Tray Partitions

Overview

Aluminum alloy cable trays have good strength, beautiful appearance, large carrying capacity. Also, they are designed into several patterns such as channel design, perforated design, ladder design, which are suitable for power plant, chemical, petroleum and other high. The aluminum cable tray is a lightweight, durable, and cost-effective solution used for organizing and safely carrying electrical and data cables. With easy installation and strong corrosion resistance, it is ideal for both indoor and outdoor applications. Lightweight and High Strength 2. Because of their lighter weight aluminum cable trays are easier to install than steel cable tray. Aluminum alloy cable tray is made of aluminum alloy through extrusion molding.
