

Anning Cable Tray Trough Type

AI Overview

Anning Trough-Type Cable Trays are robust, continuous-bottom systems designed to support, protect, and organize electrical cables in industrial, commercial, and infrastructure applications.

Overview

The trough-type cable tray is a fundamental cable management solution featuring a continuous bottom with raised sidewalls, forming a protective channel for cables while maintaining accessibility for maintenance and modifications . This design provides mechanical protection, organizes cable routing, and ensures compliance with electrical safety standards . Trough trays are suitable for a wide range of cable types, including power, control, and data communication lines .

Key Features

- **Load-Bearing Capacity:** The continuous bottom distributes weight evenly, allowing the tray to support heavy cable loads, making it ideal for industrial and high-power applications .
- **Material Options:** Available in galvanized steel, stainless steel, and aluminum, each selected for specific environmental conditions. Galvanized steel is cost-effective for indoor use, stainless steel resists harsh chemical or coastal environments, and aluminum offers a high strength-to-weight ratio .
- **Corrosion Resistance:** Coatings and material selection enhance durability and longevity, preventing rust and degradation in challenging environments .
- **Ventilation:** Some designs incorporate ventilation to prevent heat buildup, extending...
