

Artificial Intelligence in Fiber Optic Sensing

Overview

This paper presents a comprehensive review of AI-enhanced OFS technologies, encompassing both localized sensors such as fiber Bragg gratings (FBG), Fabry-Perot (FP) interferometers, and Mach-Zehnder interferometers (MZI), and distributed sensing systems based on Rayleigh . This paper presents a comprehensive review of AI-enhanced OFS technologies, encompassing both localized sensors such as fiber Bragg gratings (FBG), Fabry-Perot (FP) interferometers, and Mach-Zehnder interferometers (MZI), and distributed sensing systems based on Rayleigh . This paper presents a comprehensive review of AI-enhanced OFS technologies, encompassing both localized sensors such as fiber Bragg gratings (FBG), Fabry-Perot (FP) interferometers, and Mach-Zehnder interferometers (MZI), and distributed sensing systems based on Rayleigh, Brillouin, and Raman. This paper presents a comprehensive review of AI-enhanced OFS technologies, encompassing both localized sensors such as fiber Bragg gratings (FBG), Fabry-Perot (FP) interferometers, and Mach-Zehnder interferometers (MZI), and distributed sensing systems based on Rayleigh, Brillouin, and Raman. These sensors detect anomalies in the input data to the system, allowing alerts to be generated for early risk detection. The advancement of artificial intelligence has led to improved sensor systems and networks, resulting in devices with better performance and more precise results by. This is the power of fiber optic sensing, a technology that transforms ordinary optical fibers into the digital world's sensory network. In 2023, researchers turned submarine cables into earthquake warning systems and gave electric vehicles “optical nerves” to prevent battery failures.

Article Content

Jul 23, 2026

Application of machine learning in optical fiber sensors

Machine learning (ML), as a subset of artificial intelligence (AI), has played an important role in the intelligent

Mar 21, 2026

AI in Distributed Fiber Optic Sensors: Revolutionizing Sensing ...

3. Luna Innovations Luna Innovations specializes in optical technologies and has been a key player in Distributed

Dec 11, 2025

Optical fiber sensors enhanced by artificial intelligence: advances ...

This review provides a structured synthesis of AI-enhanced optical fiber sensing systems, mapping learning-based

Feb 26, 2026

Integrating an optical fiber sensor and artificial intelligence for ...

This work integrates optical fiber detection with artificial intelligence technology, demonstrating significant potential for

Nov 04, 2025

Artificial Intelligence and Machine Learning in Optical Fiber Sensors ...

The integration of artificial intelligence (AI) with optical fiber sensing (OFS) is transforming the capabilities of modern sensing

Jan 13, 2026

Fully Automated and AI-Assisted Optical Fiber Sensing System for ...

Herein, we developed a fully automated multiplexed optical fiber sensing system based on artificial intelligence (AI)

Nov 04, 2025

Recent Advances in Machine Learning for Fiber Optic Sensor

Fiber optic sensor technologies hold great promise to form the backbone for next-generation intelligent sensing

Mar 05, 2026

Optical Fiber Technology | Artificial Intelligence for Optical Fibers ...

Artificial intelligence (AI) saw a huge interest in optical fiber based technologies in recent years with powerful short

Jan 12, 2026

AI-Assisted Fiber Optic Sensors for Simultaneous Measurement

1 Fiber Optic Sensors and Artificial Intelligence (AI): Brief History and Overviews 1.1 Fiber Optic Sensors After the

Nov 24, 2025

AI in Optical Fiber Sensors and Sensing Network

This chapter covers the way AI has brought about change in the application of fiber optic sensors and also gives

Nov 26, 2025

Fusion of Distributed Fiber Optic Sensing, Acoustic NDE, and Artificial ...

Emerging opportunities combining acoustic non-destructive evaluation, optical fiber sensing, and AI are discussed for infrastructure

Jun 27, 2026

(PDF) Machine Learning Applications in Optical Fiber Sensing: A ...

The aim of this work is to conduct a bibliometric analysis using the PRISMA 2020 set to identify research trends in the

Jul 08, 2026

Efficient Optical Fiber Sensing System Through Enhanced Machine ...

In recent years, machine learning (ML) has been increasingly applied to the processing of optical signals, but

Sep 26, 2025

Recent Advances in Machine Learning for Fiber Optic Sensor

These challenges can be overcome by building advanced data analytics engines enabled by recent breakthroughs in

May 09, 2026

Review of Optical Fiber and Integrated Photonic Sensors for ...

Smart manufacturing, Industry 4.0, and cyber-physical systems (CPSs) require sensing architectures capable of

Aug 08, 2025

Machine Learning for Real-Time Data Analysis in Fiber Optic Sensing

The use of artificial intelligence is also useful in sensor calibration and self-tuning of fiber optic sensing systems. In the

Jul 09, 2026

Turning Fiber into a Sensing System: The Magic of

Imagine a world where the Internet doesn't just connect but senses —detecting earthquakes,

May 15, 2026

Intervention of Machine Learning and Explainable Artificial ...

This letter illustrates the successful application of machine learning (ML) models with explainable artificial intelligence

Mar 07, 2026

Optical Fiber-Based Structural Health Monitoring: Advancements

Structural health monitoring (SHM) plays a vital role in ensuring the safety, durability, and performance of civil

May 08, 2026

Artificial Intelligence Applications in Optical Sensor Technology

The field of optical sensor technology is changing under the influence of artificial intelligence (AI), driving

Apr 02, 2026

(PDF) Recent Advances in Machine Learning for Fiber

These challenges can be overcome by building advanced data analytics engines enabled by

Jul 22, 2026

Explore Benefits of Distributed Fiber Optic Sensing for Optical Network ...

We review various applications of distributed fiber optic sensing (DFOS) and machine learning (ML) technologies that

Jul 27, 2025

AI-assisted fibre optic sensing frameworks for ...

This review examines the integration of artificial intelligence (AI) with fibre optic sensing (FOS) for automated structural

Jun 16, 2026

Machine Learning Applications in Optical Fiber Sensing: A ...

The advancement of artificial intelligence has led to improved sensor systems and networks, resulting in devices with

Sep 21, 2025

AI Techniques for Signal Processing in Optical Fiber Sensors

AI techniques, from machine learning (ML) to the most recent developments in deep learning (DL), are widely utilized in
