

Battery Material Cable Tray Manufacturer

AI Overview

Leading manufacturers of battery trays include BENTELER, Hydro, Aumann AG, AIB Kunstmann, and XD THERMAL, offering solutions in aluminum, steel, and composite materials.

Key Manufacturers and Their Capabilities

BENTELER BENTELER produces battery trays primarily from extruded aluminum profiles, with options for sheet metal and press-hardened steel for crash reinforcement. Their designs optimize structural integrity, crash protection, and weight reduction, and they evaluate loads such as twisting during driving to ensure durability. They offer both aluminum and stainless steel solutions, balancing cost, fire protection, and carbon footprint considerations . Hydro Hydro specializes in lightweight, high-strength aluminum extrusions for automotive battery components. Their capabilities include CNC machining, MiG/TiG welding, and thermal management integration. Hydro emphasizes weight-to-strength optimization, corrosion resistance, and crash performance, supporting both fully electric and hybrid vehicles. They also provide low-carbon and recycled-content aluminum alloys for sustainable manufacturing . Aumann AG Aumann AG focuses on highly automated manufacturing of battery boxes and trays, with expertise in welding, automation, and handling. They provide solutions for complex geometries and end-of-line processes, ensuring high weld quality and precise component assembly. Their approach leverages simulation tools to optimize tray design and performance . AIB Kunstmann AIB Kunstmann offers steel and plastic battery trays, including coated options using PE and PUR processes. They provide customized solutions for lithium and explosion-proof applications, with structural analysis and material-reduced designs. Their trays are produced in Germ...
