

Brazilian stress-sensing optical cable size manufacturer

AI Overview

Cabletech, HT Cabos, Cablena, and Induscabos are key Brazilian manufacturers of optical cables, with Cabletech notably exploring fiber optic sensing technologies.

Key Manufacturers

Cabletech Cabletech is a Brazilian company with four manufacturing parks in Brazil and a fiber optic cable line launched in 2019. They are actively involved in advanced optical technologies, including fiber optic gyroscopes, which are sensors that detect rotation using light. This indicates their capability to produce optical fibers suitable for sensing applications, potentially including stress or strain monitoring in industrial or structural contexts . HT Cabos HT Cabos, part of the Hengtong Group, produces a wide range of optical cables for underground and overhead applications. Their product line includes single-mode fibers (G652D, G655, G657A1/A2) and dielectric optical cables capable of housing up to 144 fibers. While primarily focused on telecommunications, their expertise in high-quality optical fibers could support adaptation for stress-sensing applications . Cablena Cablena manufactures optical, automotive, and power cables in Brazil, emphasizing quality and environmental responsibility. Their optical cable production capabilities make them a potential supplier for specialized fiber optic applications, though specific stress-sensing products are not explicitly listed . Induscabos Induscabos is a long-established Brazilian manufacturer of electrical and optical cables, including medium- and high-voltage solutions. They have experience in large-scale industrial projects and renewable energy systems. While their focus is broader, their advanced production...
