

Bullet Bridge

Overview

Bullet Bridge is an independent browser extension for Pushbullet users. It brings Pushbullet sending, receiving, file sharing, mirrored notifications, push history, media previews, search, and right-click sharing back to modern Chromium-based browsers. Send notes, links, current tabs, files, selected text, and image URLs. Browse push history by device with older-history loading and loaded-history search. Preview. Map of Mumbai-Ahmedabad high-speed rail corridor. The Mumbai-Ahmedabad High Speed Rail Corridor (Mumbai-Ahmedabad HSR) is an under-construction high-speed rail line, which will connect Mumbai, Maharashtra, the financial hub of India, with Ahmedabad, the largest city in the state of Gujarat. Our primary bridge is powered by Hyperlane, supporting deposits from Solana and all other major chains, with Solana deposits finalizing in 15s —far faster than Ethereum rollups.
