

Bus Cold Aisle IP54 Manufacturer

AI Overview

Leading manufacturers of IP54-rated cold aisle containment systems include Eaton, Vertiv, Legrand, and Altimir, offering modular, busway-compatible solutions for data centers.

Overview

Cold aisle containment systems are designed to enclose the cold aisle in front of server racks, ensuring that cold supply air is directed efficiently into equipment intakes while preventing mixing with hot exhaust air. IP54-rated systems provide protection against dust and water splashes, safeguarding sensitive network equipment from harsh conditions and seismic events. These systems are compatible with busway installations, allowing seamless integration with power distribution infrastructure.

Key Manufacturers and Solutions

- Eaton: Offers modular cold aisle containment kits with IP54-rated sliding doors and clear roof panels. Their systems are compatible with 42U, 45U, and 48U racks, and support both standard (600 mm) and wide (750 mm) cabinets. Eaton emphasizes easy installation without contractors, energy efficiency, and TAA compliance.
- Vertiv: Provides freestanding, rack-independent aisle containment solutions adaptable to hot or cold aisles. Vertiv systems can be deployed before or after rack installation, supporting raised floor and slab data centers. They offer modularity, scalability, and integration with fire suppression systems.
- Legrand: Features the Contain-IT FLEX system, a modular cold aisle containment...
