

Cable Trench and Optical Cable Laying Construction Plan

Overview

The document outlines steps like obtaining permissions, excavating trenches, laying ducts, providing additional protection, backfilling trenches, and performing optical tests after installation. specifications under which the various work for trenching & laying of optical fiber cable are to be executed by the Vendor. It also discusses using additional protective pipes like RCC or GI pipes over the HDPE ducts in. Underground placement is necessary and unavoidable in certain areas for various reasons such as nature and heritage conservation, natural obstacles, aesthetics, space and safety. It forms a critical backbone for modern communication networks across both urban and rural environments. Preference will be given for Horizontal.
