

Cable tray drilling production

Overview

In exploration and production facilities (e., offshore rigs and well sites), cable systems must withstand high humidity, salt spray, and vibration. Cable trays here must support critical power and instrumentation runs while aligning with marine and safety standards. The cable tray production line is an intelligent mechanical integrated system designed for the production of cable tray systems, which realizes the precise forming of the bridge structure through automated processes. Our production line is equipped with intelligent punching, roll forming and. Upgrade your factory with an automated cable tray production line to reduce costs and boost output.

WhatsApp☑17802216114Email☑bernice@hx-machinery. com cable tray production line Our advanced cable tray production line is engineered to provide automated forming, punching, and cutting processes for. Have you ever wondered how these uniform trough-type cable trays are manufactured efficiently and precisely?

This video takes you through our highly automated cable tray machine production line. You'll witness how a coil of metal strip is transformed into standardized, ready-to-install cable trays. The cable trunking production line is used to safely and neatly route energy and data cables.
