

Cable tray nut orientation

Overview

Thread hex nut 25 mm (1") to 50 mm (2") above location of the tray bottom. The cross member comes next followed by a second set of square washers. All vertical hangers will project through the cross member. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. When offloading tray from a flat deck trailer using an overhead crane, care should be exercised in the placement and length of the slings to prevent crushing the product (siderails). All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transpos regulations which. Cable trays play a vital role in supporting electrical cables and wires in commercial, industrial, and utility installations. One of the most recognized frameworks globally is the IEC standard for.
