

Cable tray recognition error

Overview

To solve this issue: Duplicate another cable tray type (do not duplicate the type that doesn't work, as any flaws in that type will also be duplicated); Rename it as needed, and add the appropriate data; Delete the original non-working cable tray

To solve this issue: Duplicate another cable tray type (do not duplicate the type that doesn't work, as any flaws in that type will also be duplicated); Rename it as needed, and add the appropriate data; Delete the original non-working cable tray

The cable trays aren't connecting no matter what angle I try to connect them and I am presented with the following error message in the image attached despite loading all the cable tray connectors. At first I thought the angles were perhaps too much for the software to automatically connect but. Cable tray installation errors can lead to misalignment, reduced functionality, and even safety hazards. These errors often stem from improper measurements, environmental factors, or lack of adherence to standards. It is really important in: Despite these benefits, cable management is sometimes disregarded during design or installation stages, which results in many issues that could have been readily prevented with suitable. When drawing cable tray, Revit displays an error that the specified fitting is not in the project, but it is in the project. The Cable tray type is corrupted. Was this information helpful?

Need. hii, i am new in dynamo. i am trying to place support for cable tray. In most EPC projects, rejection is triggered by: ☐☐ A technically “good” product with poor documentation will still be rejected.
