

Cable trays used for lighting

AI Overview

Yes, cable trays can hold lighting fixtures, provided the tray type and load capacity are suitable for the weight of the lights.

Cable Trays for Lighting

Cable trays are primarily designed to support and organize electrical cables, including those for lighting systems. Lighting cable trays are specifically made to hold and protect cables used in lighting, ensuring neat installation and reducing the risk of damage while sometimes serving as a decorative element. They can be made from PVC, aluminum, or steel, and come in various shapes, sizes, and lengths, typically ranging from 1 to 3 meters.

Mounting Lights on Cable Trays

Certain cable trays allow direct attachment of lighting fixtures. Accessories such as box mounts or wall mounts can secure lights to the tray, enabling safe installation on walls, ceilings, or suspended systems. This is particularly useful in industrial or commercial settings where overhead lighting needs to be integrated with cable management.

Load Capacity Considerations

Cable trays are classified by duty levels—light, medium, and heavy duty—based on the weight they can safely support. Light-duty trays are suitable for small cables and lightweight fixtures, while medium and heavy-duty trays can support heavier cables...
