

Class B Distribution Box Connector Specifications

AI Overview

Class B distribution box connectors are available in multiple pin configurations, port counts, and wiring types, with options for LED indicators and pre-wired or quick-disconnect cables.

Connector Types and Pin Configurations

Class B distribution boxes support a variety of connector types including 3-pin pico, 3- and 4-pin mini, 4-pin DC micro, and 3-pin AC micro connectors. The main connector can be customized for the number of pins required, typically ranging from 2 to 10 pins, depending on the application and the number of devices connected .

Port Options

Distribution boxes are available with 4, 6, 8, or 10 ports, allowing parallel wiring of multiple devices. This flexibility enables easy expansion and integration of sensors, actuators, or other field devices without extensive rewiring .

Wiring and LED Options

Connectors can be configured for PNP or NPN wiring, and LED or non-LED versions are available. LED models provide visual status indication for easier troubleshooting and monitoring. The wiring diagram may vary depending on the specific unit, with some units using PNP status indicators, NPN status indicators, or no indicators at all
