

Coherent single-mode polarization-maintaining fiber

Overview

Coherent's PM2000D fibers are designed for high-power laser systems operating at $\sim 2\text{ }\mu\text{m}$. The advanced NuCOAT fluoroacrylate coating ensures durability and reliable. Use single-mode and large-mode area polarization maintaining fibers in demanding network applications. Stress rods run parallel to the fiber's core and apply stress that creates birefringence in the fiber's core, allowing polarization-maintaining. For purchasing, use the RP Photonics Buyer's Guide for polarization-maintaining fibers. It provides an expert-curated supplier directory, buyer-focused technical background information, and structured selection criteria to support professional procurement decisions. Distributed sensing fibers for temperature, pressure, flow, acoustics, or strain, that operate even in harsh environments with superior. The PM1060L fiber is a single clad fiber and PM106-FA is double clad fiber to cover all your application needs.
