

Complete electrical distribution box in Burundi

AI Overview

For reliable electrical distribution in Burundi, XL-21 low-voltage cabinets, DIN rail terminal block boxes, and modern DB boxes with circuit protection are recommended.

XL-21 Low-Voltage Power Distribution Cabinets

The XL-21 type is a widely used low-voltage distribution cabinet suitable for industrial, commercial, and institutional applications in Burundi. It supports single-phase and three-phase systems with voltages below 500V and load currents up to 630A. The cabinet is made of bent steel plates with a compact, wall-mounted design and a front-opening door for easy maintenance. It can be equipped with air circuit breakers, fuses, contactors, thermal relays, and knife switches, ensuring reliable protection and flexible circuit configurations. The enclosure meets IP30 protection standards and complies with IEC 60439-1 and GB7251.1 safety standards, making it suitable for schools, government buildings, and industrial facilities .

DIN Rail Terminal Block Distribution Boxes

For smaller-scale or modular installations, DIN rail terminal block distribution boxes are recommended. These boxes are ideal for residential, commercial, and light industrial applications, providing organized connections for multiple circuits. They are typically made from engineering thermoplastics or powder-coated steel, offering durability and protection against dust and moisture. DIN rail boxes allow easy instal...
