

Construction Site Secondary Distribution Box Service Provider

AI Overview

Secondary distribution boxes (Class II) for construction sites are available from specialized electrical suppliers like Ayump Electric and Wieland, offering solutions for safe and efficient power distribution.

Overview of Secondary Distribution Boxes

Secondary distribution boxes, also known as Class II or sub-distribution boxes, are responsible for supplying power to specific areas or equipment on a construction site. They are part of a three-level distribution system:

- Level I: Primary distribution box controlling the entire site power supply.
- Level II: Secondary distribution box supplying power to a specific area or group of equipment.
- Level III: Final distribution box for individual equipment or machines, often indoors with minimal mechanical or waterproof requirements . Secondary boxes typically include main isolation switches, circuit breakers, and fuses, and are designed to meet local safety standards for temporary construction electricity .

Key Features

- Safety and Compliance: Designed according to construction site safety codes (e.g., JGJ46-2005), ensuring proper load control and protection.
- Ease of Installation: Many boxes feature modular designs, accessible fuse compar...
