

Construction of the Eastern European Energy Internet

Overview

Our specific areas of focus include efforts to reduce energy poverty, increase the number of energy communities producing renewable energy, improve the digitalisation of building-level data for greater energy efficiency, and strengthen local energy and climate adaptation. Our specific areas of focus include efforts to reduce energy poverty, increase the number of energy communities producing renewable energy, improve the digitalisation of building-level data for greater energy efficiency, and strengthen local energy and climate adaptation. ENTSO-E position, including recommendations, on the European Commission's Grids Package proposal. Advanced digital network infrastructure and digital services will be key in shaping the competitiveness of many European Union (EU) sectors – among them manufacturing, energy and healthcare – in the near future. Along with Ukraine and Moldova, the EU has created an elaborate legal and institutional framework that provides a platform for energy. The Central and Eastern European Sustainable Energy Network (CEESEN) is the only umbrella organisation representing green transition actors in Central and Eastern Europe (CEE). We serve as a low-carbon economy knowledge base and network, a voice for the region at the EU level, and a platform that. progress towards a low carbon, sustainable economy.
