

Cuban underground fiber optic cable manufacturer

Overview

The ARIMAO submarine fiber optic cable is designed and deployed to improve internet connectivity between the islands of Cuba and Martinique. The cable is named after the nearby Arimao River that. We have local factory, delivery in any time and any place you want The most advanced technology and globe R&D team support A full set of test equipment that meets international standards Different cable design according to customer's needs High accuracy Optical Time Domain Reflectometer (OTDR) is. Nearly two years ago, the Internet research company I work at, Dyn, broke the story about the activation of the first submarine cable connecting Cuba to the global Internet—a cable that, prior to its activation in January 2013, mysteriously lay dormant on the ocean floor for nearly two years. Lightera isn't just about connectivity, it's about empowering industries, advancing technology, and improving lives with the power of optical technology. The president of the Cuban Telecommunications Company.
