

Delivery date Cold aisle rack IP68

LoRawan outdoor base station

- * Industrial Internet gateway
- * Compatible with LoRaWAN network,
- * ClassA/B/C mode
- * Support 8/16 channel
- * Supports PoE power
- * supply and backup battery power supply
- * 10KV lightning protection

AI Overview

Delivery dates for cold aisle racks with IP68 rating depend on manufacturer stock, customization, and shipping logistics, and must be confirmed directly with the supplier.

Key Factors Affecting Delivery

1. Customization and IP68 Rating Cold aisle racks with an IP68 rating are designed to be fully dust- and water-resistant, which often requires specialized sealing, materials, and assembly. Many standard cold aisle containment systems, such as those from Legrand or Eaton, are modular and configurable for 42U, 47U, or 52U racks, but IP68 enclosures may need custom fabrication to meet the rating, which can extend lead times . 2. Stock Availability Some manufacturers maintain stock components for standard cold aisle containment systems, allowing faster assembly on-site . However, IP68-rated racks are less common and may not be stocked in all regions, requiring order-specific production. 3. Shipping and Logistics Delivery time is influenced by location, shipping method, and order size. Large racks or full aisle containment systems may require freight shipping, which can add several days to weeks depending on distance and customs clearance if imported. 4. Installation Planning Cold aisle containment systems are often assembled on-site using modular components, including doors, roof panels, and wall beams . Even after delivery, installation may take additional time, especially for IP68-rated systems that require precise sealing to maintain water and dust resistance.
