

Diagram of House Electrical Distribution Box System

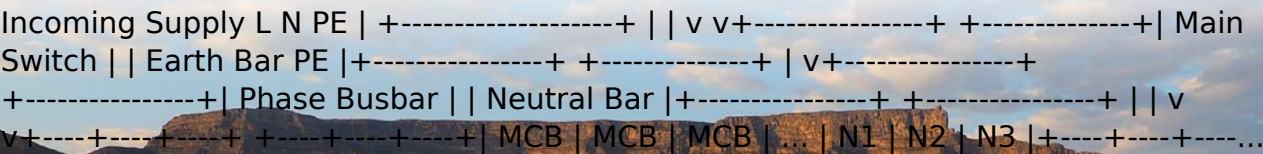

AI Overview

A typical home electrical distribution box diagram includes a main switch, MCBs, RCDs, neutral and earth bars, and outgoing circuits arranged logically for safety and serviceability.

Key Components in a Home Distribution Box

- Main Switch/Isolator: Controls the incoming supply and allows complete disconnection for maintenance or emergencies .
- MCBs (Miniature Circuit Breakers): Protect individual circuits from overload and short circuits .
- RCDs (Residual Current Devices): Detect earth leakage and prevent electric shocks; they do not protect against overload .
- Neutral Bar: Collects all neutral wires from outgoing circuits .
- Earth Bar: Connects all protective earth wires to ensure grounding .
- SPD (Surge Protective Device): Optional module to protect against voltage surges .
- Busbars: Conductors that distribute power to MCBs and other devices .
