

Dimensions of Distribution Box and Lighting Cabinet

AI Overview

Distribution boxes and lighting cabinets come in a range of standard sizes, from compact wall-mounted boxes to large floor-standing cabinets, depending on application and equipment requirements.

Typical Distribution Box Sizes

Wall-mounted distribution boxes are commonly used in residential and light commercial settings. Typical dimensions range from 200 × 200 × 120 mm up to 800 × 600 × 300 mm, depending on the number of circuits, devices, and internal wiring space required . Single-gang boxes for one device are usually around 2" × 3" × 3.5", while multi-gang or junction boxes can measure 4" × 4" or larger, with varying depths to accommodate multiple wires and splices . Floor-standing distribution cabinets are more common in industrial or commercial applications. Standard heights range from 1600–2200 mm, widths from 600–1800 mm, and depths from 300–600 mm . These cabinets often house breakers, bus bars, relays, and control equipment, and are designed to allow for future expansion and proper cable management.

Lighting Cabinet Dimensions

Lighting cabinets, which may include control panels for lighting circuits, typically follow similar size conventions to distribution boxes. Compact wall-mounted lighting control panels can be around 24" × 24", while larger floor-standing cabinets for extensive lighting systems may reach 48" × 72" . Internal layout considerations incl...
