

Direct Sales of SFP Aggregator Switches

AI Overview

SFP aggregator switches are available for direct purchase from vendors like Ubiquiti, Grandstream, TP-Link, Axis, and Switch SFP, offering a range of Layer 2/3 switches with SFP/SFP+ connectivity for enterprise and SMB networks.

Vendor Options and Features

Ubiquiti offers an 8-port Layer 2 aggregation switch designed for 10G SFP+ connections, with high-performance modules, priority support, and a 5-year coverage plan, suitable for high-speed network backbones. Grandstream Networks provides the GWN7830 Series of Layer 3 aggregation switches, supporting up to 24 SFP ports and 12 SFP+ ports. These switches include advanced VLAN, QoS, IGMP/MLD Snooping, and comprehensive security features. Management is available via local Web UI, CLI, or cloud platforms like GWN.Cloud and GWN Manager, making them ideal for medium-to-large enterprises. TP-Link Omada Aggregation Series delivers all-fiber ports with speeds up to 25 Gbps, supporting static routing, DHCP server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management. Some models allow physical stacking and advanced Layer 3 features for scalability and reliability. Axis D8308 Fiber Aggregation Switch is optimized for long-distance fiber connections, enabling easy expansion and advanced network configuration including VLAN, QoS, port security, and spanning tree. Axis products are sold through authorized resellers, system integrators, and installers, with support for installation and configuration tools. Switch SFP specializes in optical transceivers and compatible SFP/SFP+ modules, offering direct sales in the UK with lifetime warranty and a 60-day return policy. They provide modules compatible with Cisco, Juniper, and Palo Alto devices, along with fiber cabling solutions for short- and long-reach connections
