

Distribution Box Leaf

Overview

A distribution box (d-box) is a small concrete or plastic box installed between a septic tank and drain field that divides outgoing effluent equally among multiple leach lines. Without it, wastewater would flood one section of the drain field while starving others, causing premature. Available in 12" and 20" Widths The most versatile box on the market today. Choose from 5 heights to set your inlets and outlets on each side. It also comes complete with the only seal on the market that accepts 2", 3", 4" smooth wall and corrugated pipe. We set our own Everyday Low Prices as well as sale prices, but some manufacturers restrict how retailers display that pricing. In these cases manufacturers require that you take some steps to add the item to your cart or go to checkout to view our final prices when lower than the manufacturer's set. Frequently-asked questions and answers about septic system distribution boxes or D-boxes: what is a D-box, where is the D-Box, why do we need a D-box, and how do I fix or replace a D-box?

In this article series about septic system drop boxes we describe the best procedures for locating and.
