

Distribution Box Quality Series

AI Overview

Distribution Box Quality Series are modular electrical enclosures designed for safe, reliable, and durable power distribution across residential, commercial, and industrial applications.

Key Features and Materials

High-quality distribution boxes are typically constructed from stainless steel (grades 201, 304, 316) or premium steel and durable plastics, offering corrosion resistance, flame retardancy, and long-term durability in harsh environments (VIOX, Ceepower, BARTEC) . They often feature IP-rated protection against dust and water, with some models reaching IP67, ensuring suitability for outdoor and industrial conditions . Ergonomic designs include quick-access panels, modular components, and well-planned cable entry points for easy maintenance and inspection .

Series and Applications

- VIOX Series: Offers stainless steel enclosures with modular designs, flame-retardant materials, and high IP ratings. Suitable for residential, commercial, and industrial installations, including weatherproof and dust-resistant applications .
- Ceepower PDX/TSPE Series: Modular boxes for indoor and outdoor use, with wall-mounted or flush-mounted options. Equipped with MCCBs for large power consumers and specialized variants for power metering and multimedia management .
- Weidmüller FieldPower® Series: Focused on decentralized signal and power distribution, with pluggable insulation displacement connections and modular busbar systems for flexible installation
