

# Do I need a router to install fiber optic cables

## Overview

Yes, fiber internet requires specific equipment including an Optical Network Terminal (ONT) and a compatible router. The ONT converts fiber-optic light signals into electrical signals your devices can use. The technician powers, tests, and activates the connection to confirm full speed and signal quality. \* For larger homes, mesh. The ONT is your modem equivalent in a fiber setup. If you're used to plugging your router into a modem, you'll now connect it directly to the ONT instead. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly recap why fiber optics are worth the effort: Lightning-fast speeds (up to 1 Gbps or higher). Low latency for. Since installing fiber most often requires laying a new cable and setting up specialized equipment, fiber providers typically do not give the option for you to self-install fiber internet.
