

Does the fiber optic cable contain an optical cable interface

Overview

The optical fiber interface is the physical interface used to connect optical fiber cables. The principle is that the light enters the light-sparse medium from the light-dense medium, resulting in total reflection. A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry. Fiber optics is a technology that uses thin glass or plastic fibers to transmit data over long distances. Every part. Cable provides protection for the optical fiber or fibers within it appropriate for the environment in which it is installed. Fiber optic "cable" refers to the complete assembly of fibers, other internal parts like buffer tubes, ripcords, stiffeners, strength members all included inside an outer.
