

EPON optical module wavelength

Overview

When selecting an EPON optical module, consider specifications such as:
Transmission Distance: Typically up to 20km. Wavelength: 1490nm downstream, 1310nm upstream. Compatibility: Must match OLT/ONU specifications. EPON, or Ethernet Passive Optical Network, is a fiber-optic network standard that uses Ethernet packets to deliver high-speed data, voice, and video services. As a key player in the FTTH (Fiber to the Home) revolution, EPON enables cost-effective, scalable internet access by leveraging passive. The EPON ONU SFP transceiver provides up to 1. It can operate at temperatures between -40°C and 85°C. Digital optical monitoring (DOM) support is also present to allow access to. The Luleey EPON OLT SFP Module is a high-performance EPON OLT Optical Module designed for FTTH access networks, EPON OLT equipment, ISP broadband deployment, and fiber access infrastructure. This EPON PX20 SFP Module supports 1.
