

# EU Mobile Optical Cable Price Inquiry

## AI Overview

As of early 2026, EU fiber optic cable prices are reflected by a producer price index of 111.20 points, with unit prices varying by type, manufacturer, and quantity.

### Current Price Levels

The Euro Area producer price index for the manufacture of fiber optic cables was 111.20 points in February 2026, indicating a moderate increase from historical lows and a stable trend compared to previous years (Eurostat, Trading Economics) . This index reflects the overall cost of production rather than retail prices, but it provides a benchmark for market pricing. For direct purchase, distributors like Mouser Europe offer fiber optic cables from leading manufacturers such as Broadcom and Banner Engineering, with unit prices in EUR that vary depending on cable type, length, and quantity ordered. Prices are typically higher for specialty or high-bandwidth cables and decrease with bulk purchases .

### Market Trends and Influencing Factors

The European wire and cable market is projected to grow from USD 49.38 billion in 2026 to USD 63.16 billion by 2031, with fiber optic lines expanding at a 6.6% CAGR. This growth is driven by digital infrastructure rollouts, smart grid integration, and next-generation wireless networks . Supply-side factors, including investment in extruded-cable capacity and geopolitical risks, also influence pricing, particularly for submarine and specialty optical cables .
