

Ecuador fiber optic cable

AI Overview

Ecuador has significantly expanded its fiber optic connectivity through submarine cables and domestic production, enhancing internet access and enabling regional exports.

Submarine Cable Projects

Ecuador is connected to international internet networks via several submarine fiber optic cables. The Mistral cable, also known as the South Pacific Submarine Cable (SPSC), spans 7,300 kilometers and links Ecuador to the United States, Guatemala, Peru, and Chile, providing connectivity to 96% of the Ecuadorian population with low latency and a potential capacity of 132 Tbps . Another key system is the Pacific Caribbean Cable System (PCCS), a 6,000 km submarine cable connecting Ecuador with Panama, Colombia, Aruba, Curacao, the British Virgin Islands, Puerto Rico, and the United States, with a system capacity of 80 Tbps . These cables are critical for improving broadband speeds, reducing latency, and supporting digital services across the country.

Domestic Fiber Optic Production

Ecuador has also inaugurated its first domestic fiber optic cable factory, LatamFiberHome, located in Durán, Guayas. This facility allows Ecuador to cover its own fiber optic needs and export surplus cables to other countries in the region. The initiative strengthens local production, creates jobs, and enhances technological independence, while also fostering cooperation with China . Currently, Ecuador has over 66,000 kilometers of fiber optic infrastructure, supporting nationwide connecti...
