

# Explosion-proof distribution boxes for factory buildings

## AI Overview

Explosion-proof distribution boxes provide safe, reliable electrical distribution in hazardous industrial environments, preventing sparks and electrical explosions.

### Key Features

Explosion-proof distribution boxes are designed to protect electrical systems in hazardous areas where flammable gases, vapors, or dust may be present. They prevent sparks or overloads from causing fires or explosions, ensuring both personnel safety and operational continuity . Common features include:

- Integrated control safety cabinets for monitoring and operation
- Sockets, power supply switches, maintenance lighting, and junction boxes in one compact unit
- Durable materials such as 316 stainless steel, aluminium, or polyester for corrosion resistance and long service life
- Hinged doors and specialized hinges to protect flameproof joints during opening and closing
- Customizable configurations to meet specific factory distribution requirements

### Certifications and Standards

Explosion-proof distribution boxes are typically IECEx and ATEX certified, suitable for Zone 1 and Zone 2 hazardous areas . These certifications ensure compliance with i...
