

External Dimensions of Indoor Distribution Box

AI Overview

Indoor distribution boxes typically range from 200×200×120 mm up to 800×600×300 mm for wall-mounted units, with larger freestanding cabinets reaching 1600–2200 mm in height and 600–1800 mm in width.

Typical Wall-Mounted Distribution Boxes

Wall-mounted indoor distribution boxes are commonly used for residential, commercial, and light industrial applications. Their external dimensions usually fall within the following ranges:

- Width: 200 mm to 800 mm
- Height: 200 mm to 600 mm
- Depth: 120 mm to 300 mm These dimensions represent the total footprint of the box, which is critical for planning installation space. Popular combinations often include 400×400×200 mm, 600×400×200 mm, and 800×600×300 mm, depending on the number of modules or circuit breakers required .

Freestanding or Floor-Standing Cabinets

For larger indoor distribution systems, freestanding cabinets are used to house more complex electrical setups. Typical external dimensions for these units are:

- Height: 1600 mm to 2200 mm...
