

Fiber Optic Cable Junction Box Dimensions and Fabrication

AI Overview

Fiber optic junction boxes vary in size and design, typically ranging from compact wall-mounted units to larger dome enclosures, fabricated from high-strength plastics or metal with IP-rated sealing for environmental protection.

Dimensions

Fiber optic junction boxes come in a variety of sizes depending on their capacity and application:

- Compact wall-mounted boxes: For indoor or small-scale installations, dimensions can be around 84 × 130 × 24 mm, accommodating 2 adapters and SC/LC connectors .
- Dome mechanical enclosures: For larger outdoor or high-capacity applications, a 48-core dome box may measure 510 × 218 mm, supporting multiple PLC splitters and up to 18 drop cable inputs/outputs .
- Cable gland accommodation: Boxes like the MR398-JB series allow for cable diameters up to 12.4 mm and support Duplex LC, ST, or industrial-grade IP-LC connectors . Dimensions are often customizable to meet specific network requirements, including the number of cores, splitter trays, and drop cable ports .

Fabrication and Materials

- Material: High-strength engineering plastics (e.g., PC) or ABS are commonly used...
