

Fiber Optic Cable Pipe Diameter Price

AI Overview

Fiber optic cable conduits are available in diameters from 3 mm to 50 mm, with prices varying by material, wall thickness, and installation type.

Common Pipe Diameters

- **HDPE Conduits:** Standard high-density polyethylene (HDPE) pipes are widely used for underground and aerial fiber installations. Typical diameters range from 3 mm to 50 mm, with small-diameter tubes (3–10 mm) used for blown fiber installations and larger rigid pipes for direct-burial or greenfield projects .
- **Silicone-Coated HDPE Ducts:** These composite pipes have a silicone inner lining to reduce friction during cable installation. Common diameters include 32 mm, 40 mm, and 50 mm, with wall thicknesses from 2 mm to 6 mm depending on installation requirements .
- **Fiberglass Tubes:** Fiberglass reinforced plastic tubes are used as protective casing for fiber optic cables. Standard sizes include 32 mm and larger, often available in multi-way configurations (2-way, 3-way, 5-way, 7-way, 24-way) for multiple cable runs .

Price Estimates

- **HDPE Conduits:** Prices vary by diameter, wall thickness, and length. Small-diameter HDPE tubes (3–10 mm) are generally lower cost, while larger 32–50 mm pipes are more expensive due to material and manufacturing complexity .
- **Silicone-Coated HDPE Ducts:** Pricing depends on diameter and length. For example, a 32 mm/26 mm duct can be supplied in 3,000 m reels, with costs influenced by wall thickness and coating
