

Fiber Optic Terminal Box SC Interface

Overview

SC ports, short for Subscriber Connectors, are strong and easy to use. They have a push-pull design, making setup and maintenance simple. The HTB8010 4 Ports FTTH Fiber Termination Box is specially designed for fiber access termination in residential or light commercial buildings. Functions as the terminal node to connect feeder cables with drop cables in FTTx networks. Supports splicing, distribution, and cable management for up to 24 fibers. What is an optical fiber patch Cable?

An optical fiber patch Cable is a jumper wire used to connect from equipment to an optical fiber cabling link, and it is usually used for the connection between an optical transceiver and a terminal box. It is widely applied in fields such as optical fiber. SC and LC ports are important in Fiber Optic Termination Boxes. They work well with single-mode and multi-mode. 1F FTTH Fiber Outlet Box FTTH 1 port OTO with Label Available with 1,2,4 fibres Pre-connectorized cable Multiple lengths available Easy to through tube Protection against any risk of interference with the laser beam Security in connection cord retention The reliability of the grip of the socket on.
