

Fiber distribution box production double door

AI Overview

Double-door fiber distribution boxes provide secure, organized, and high-capacity management for optical fibers in indoor and outdoor applications.

Overview

Double-door fiber distribution boxes are designed to terminate, splice, and organize optical fibers while offering enhanced security and accessibility. They are commonly used in telecommunications rooms, enterprise networks, industrial facilities, and residential fiber installations. The double-door design allows for separate compartments for splicing and connector management, improving workflow and maintenance efficiency .

Key Features

- **Capacity:** These boxes can accommodate 24 to 96 fibers with single-fiber connectors, and higher densities with multi-fiber connectors. Some models, like the Nexconec WP48D, support up to 48 SC ports .
- **Material:** Constructed from ABS plastic or 16-gauge steel, ensuring durability, water resistance, and protection against dust and environmental factors .
- **Security:** Lockable doors prevent unauthorized access, making them suitable for unsecured indoor areas .
- **Internal Organization:** Includes splice trays, slack spools, and detachable adapter plates for neat fiber management. Integrated cable tie points secure incoming cabl...
