

Fiber optic box flange connector model

AI Overview

Fiber optic box flange connectors are available in multiple series including threaded optical wall, SM05, SM1, and C-Mount, supporting FC/PC, FC/APC, and SMA connectors.

JCOPTIX Fiber Flange Series

JCOPTIX offers four main series of fiber optic flanges suitable for box or optical system integration :

- Threaded (Optical Wall) Series: Designed for mounting on optical walls or enclosures, available in diameters Ø12.7 mm and Ø25.4 mm. Supports conversion between optical wall holes and FC/APC connectors.
- SM05 Threaded Series: Compatible with SM05 (0.535"-40) threaded systems, often used with lens sleeves and free-space optical couplers.
- SM1 Threaded Series: Compatible with SM1 (1.035"-40) threaded systems, suitable for higher precision optical setups.
- C-Mount Threaded Series: Allows integration with C-Mount threaded optical components, often used in imaging or laser systems.

Connector Compatibility and Keying

These flanges can convert between FC/PC, FC/APC, SMA connectors, and standard SM series threaded connectors. Both FC/PC and FC/APC jumpers are equipped with alignment keys to minimize insertion loss. JCOPTIX flanges feature a 2.2 mm wide keyway, compatible with both narrow (2.0 mm) and wide key connectors
