

Fiji Level 1 Temporary Distribution Box

AI Overview

A Level 1 Temporary Distribution Box in Fiji is a mobile electrical distribution unit designed for safe, short-term power supply in events, construction, and industrial applications.

Overview

A Level 1 Temporary Distribution Box is used to distribute electrical power safely and efficiently for temporary installations. These boxes are typically employed in events, exhibitions, construction sites, and outdoor activities where permanent wiring is not feasible. They provide multiple outlets, circuit protection, and can be quickly installed and dismantled to meet changing power requirements .

Features and Specifications

- **Mobility and Flexibility:** Designed for easy transport and rapid setup, often with pluggable components for quick assembly and disassembly .
- **Safety:** Equipped with residual current devices (RCDs), miniature circuit breakers, and master switches to prevent overloads and electrical hazards .
- **Connector Systems:** Uses standardized connectors such as gesis® MINI, gesis® CLASSIC, or RST® for indoor and outdoor applications, ensuring safe and error-free connections .
- **Power Ratings:** Commonly available in 20 kVA or 40 kVA versions, depending on energy requirements .
- **Compliance:** Constructed according to IEC 61439 standards and compatible with Fiji Electricity Authority (EFL) regulations and local safety codes
