

Fireproof cable tray accessories for buildings

AI Overview

Fireproof cable tray accessories protect electrical systems from fire, smoke, and heat while ensuring compliance with NEC, NFPA, and UL standards.

Key Fireproof Cable Tray Accessories

1. Firestop Sleeves and Wall Penetration Kits Firestop sleeves are designed to seal cable tray penetrations through fire-rated walls and floors. They maintain fire compartmentalization and prevent smoke and toxic gas spread. Options include smooth firestop sleeves, threaded sleeves, and membrane sleeves, often made from rigid steel or intumescent materials, rated for 2-4 hours of fire resistance .
2. Intumescent Firestop Pillows and Putty Intumescent pillows expand under high temperatures to block fire and smoke. They are ideal for large openings or retrofit applications. Intumescent putty pads and caulks provide flexible sealing around cables and conduits, ensuring a tight fire-resistant barrier .
3. Wall Sleeves and Modular Enclosures Wall sleeves support cable trays at penetrations and can be combined with firestop products. Modular cable enclosures offer bolt-on or bolt-together installation, protecting cables from heat, fire, and blasts while allowing easy access for maintenance .
4. Fire-Resistant Coatings and Tapes Specialized coatings like FLAMMOTECT-A and fire protection tapes (DG-CR 0.7) form a protective shield around cables, delaying flame propagation and maintaining cable functionality during a fire. Aluminum foil tapes are used to seal edges of fire mats or insulation for complete encapsulation .
5. Cable Tray Accessories for Organization and Safety Accessories such as separators, clamps, covers, and ventilated trays improve cable...
