

# Fireproof cable tray project price

## AI Overview

Custom-made fireproof cable trays typically start around \$0.8 per kilogram, with final pricing depending on material, size, load capacity, and customization options.

### Pricing Overview

Custom fireproof cable trays are priced based on several factors including material type, tray length, width, load rating, and surface finish. For example, manufacturers like Shandong Xuanlin Metal Materials Co., Ltd. offer samples starting at \$0.8 per kg, with options for HDG, pre-galvanized, powder-coated, or stainless steel 304/316 finishes. Alibaba suppliers provide carbon steel trays in lengths from 2m to 6m, with fireproof coatings, where shipping and delivery costs are negotiated separately. Stainless steel trays with double insulation and corrosion resistance are also available, with custom pricing based on specifications.

### Factors Affecting Cost

- **Material:** Steel (carbon or galvanized), aluminum, or stainless steel; stainless steel is more expensive but offers superior corrosion resistance.
- **Tray Dimensions:** Width, side rail height, and length directly influence material usage and cost.
- **Load Capacity:** Higher load ratings require thicker or reinforced trays, increasing price.
- **Fire Rating:** Certified fire resistance (e.g., 60, 90, 120 minutes) may affect material and manufacturing complexity.
- **Customization:** Special coatings, perforations, or color finishes add to the cost.
- **Quantity and MOQ:** Bulk orders often reduce unit cost, while small prototype orders...
