

Fixed Installation Solution for AC DC Power Supply in Australia

Overview

We specialise in both Alternating Current (AC) and Direct Current (DC) systems to support a wide range of telecom and industrial applications. Our installations are engineered to deliver uninterrupted power supply, protect critical equipment, and optimize energy. An AC/DC power supply is a critical component, converting alternating current (AC) from the electrical grid into the direct current (DC) necessary for the operation of electronic devices. Helios' DC solutions can be customised to suit any application with options including IP rated enclosures, labelling, specific terminations and connections, remote monitoring and control. Trusted by security installers and integrators across Australia, they provide reliable DC UPS, battery chargers, power supplies, enclosures and more, all engineered for. Statronics Power Supplies (Statronics or S-Power) has established itself as a reputable and reliable company since it was founded in 1983. With over 30 years' experience in the industry, we are a pioneering power supply design, assembly and testing operation in Australia.
